2 Introduction

This document provides How-to Instructions for the component Gated Overlay. This is intended and available to be used on all 2.0-page template(s).

2.1 Short Description

This component is used to add page level hyperlinking as an overlay. There are two variations to this component, i.e. Flyout enabled or Flyout disabled. If Flyout is enabled, the form appears as a flyout popup box else the form loads in the full screen (It is recommended to use form with a max of 4 fields with this option to avoid scrolling).

AEM Component Data Model

Tab	Field Name	Field Group	Field Type	Validation	Accepted values
Configuration	Overlay ID	None	Text Field	Optional	Alphanumeric
	Close Overlay Label	None	Text Field	Optional	Alphanumeric
	Flyout Form	None	Checkbox	Optional	Checkbox
	AEM Form Path	None	Text Field	Optional	Alphanumeric

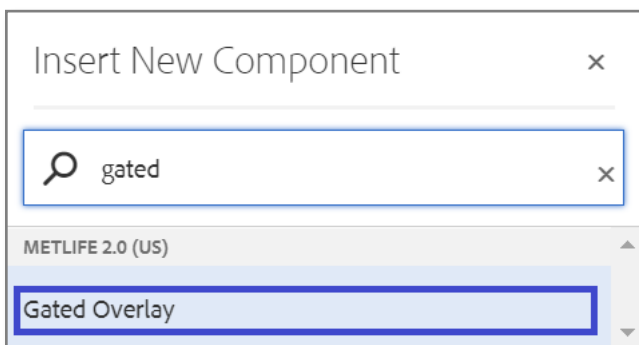

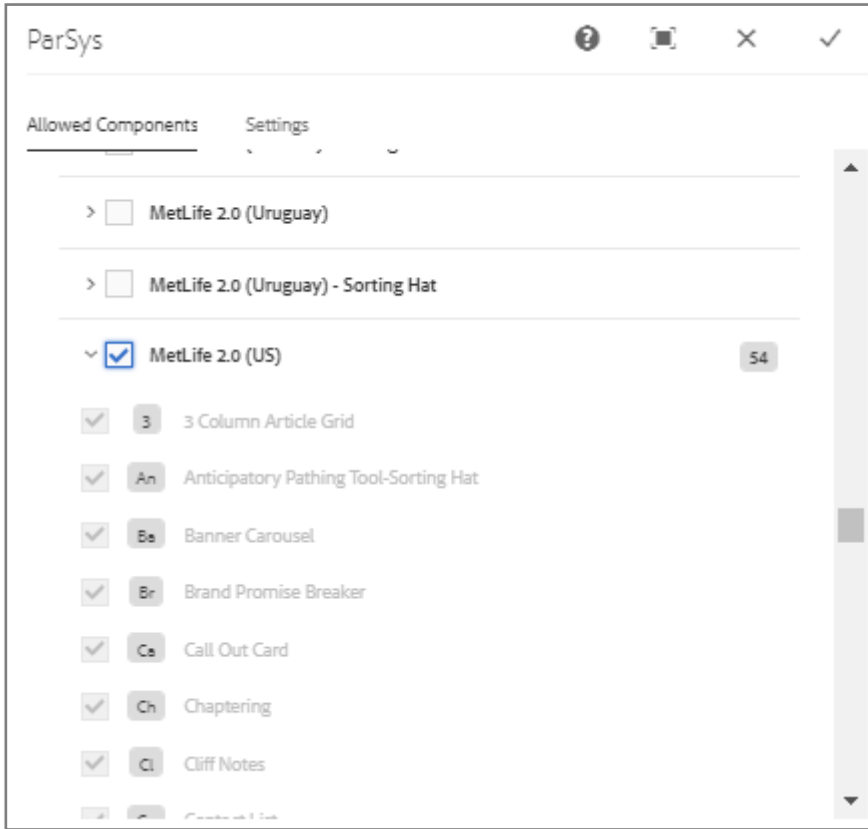

2.2 Intended Audience

The primary audience of this design is:

- Content Authors
- Agencies
- Marketers

3 How to Enable/Turn-On the Component

This component should be available by default when the Evolution set up is enabled on a page. If it is still not available, then it can be enabled by going to the *Design mode* of the page and click *Configure* button on the page and select from the list of available components (MetLife 2.0 based on the market) and click on ✓ symbol to complete the selection.

4 Component Dialog

- Select edit to open the dialog and begin editing the component fields.

Feature Overview

Configuration

1. **Overlay ID** – Provide ID for the overlay.
2. **Close Overlay Label** – Provide label for close icon.
3. **Flyout Form** – Check/uncheck the checkbox to display the form as flyout popup/full screen.
4. **AEM Form Path** – Provide the form path.

There are two variations for this component.

Variation 1: Gated Overlay with Flyout option Enabled

Flyout option must be checked to make the form appears as a flyout popup box.
